RESEARCH ACTIVITIES (in chronological order, earliest first by start date under each subcategory)

Research Focus

My research specializes in the neurobiology of sensory systems, with an emphasis on pain and regeneration. The major goal of my research is to understand the maladaptive responses that occur after peripheral nerve injury and develop strategies to improve recovery from injury as well as reduce neuropathic pain. My main areas of research are: 1) How can we assess ongoing pain in rodent models of neuropathic pain *in vivo* and what are the mechanisms

responsible, 2) How does reinnervation of target tissue after peripheral nerve regeneration affect the development of chronic abnormal pain sensitivity and 3) How is sleep architecture altered in models of acute and chronic pain?

Inventions, Patents, Copyrights

- **Patent pending:** US20170307591A1; Methods and assays relating to sepiapterin reductase inhibition.
Inventors: Clifford J. Woolf; Alexandra S. LATINI; Nick A. ANDREWS; **Alban LATREMOLIERE**; Michael Costigan
- **Patent submitted (June 13th):** 62684599: BIOMARKERS OF NEUROPATHIC PAIN

ORGANIZATIONAL ACTIVITIES

Editorial Activities

Journal peer review activities

2006-now Journal peer reviewer for 27 journals including: Current Biology, EMBO reports, European Journal of neuroscience, European Journal of Pain, European Journal of Pharmacology, Experimental Neurology, Headache, Journal of Pain, Journal of sleep medicine, PLOS one, Sleep.

RECOGNITION

Awards, Honors

2003 Fellowship of the French Minister of Research and Industry to perform a Ph.D. (MNERT). (Fellowship of \$50000 over 3 years).
2008 Fondation pour la Recherche Medical Award (FRM) for postdoctoral training (\$30000 for one year)
2011 Division of Sleep Medicine Harvard, Poster Session: Poster Award
2011 Society for Neuroscience Hot Topics for poster “Increased pain sensitivity after chronic sleep restriction in mice”
